DRUG-INDUCED PARKINSONISM IS ON THE RISE,
reflecting the growing use of potent tranquilizers.
These extrapyramidal disturbances may be reduced
by lowering tranquilizer dosage.

*"It is almost always preferable, however, to merely add oral
AKINETON®... since this avoids the risk of loss of therapeutic
benefit and permits uninterrupted phenothiazine therapy."

AKINETON®

BRAND OF BIPERIDEN

a prompt, specific countermeasure to drug-induced akinesia
motor restlessness • akathisia • torticollis • oculogyric crises • chorea

remarkably safe— "Akineton was not responsible for a
single dangerous or toxic effect in the 500 patients treated."*

Dosage: Doses required to achieve the therapeutic goal are variable and
individually adjusted. The following are average doses.

Drug-induced extrapyramidal disorders

1 tablet (2 mg.) one to three times daily

Parkinson's disease

1 tablet (2 mg.) three or four times daily

AKINETON hydrochloride tablets—2 mg., bisected, bottles of 100 and 1000.
